

■ ALL FABRIC CLEANING & STAIN TREATMENT

CLEANING AND DEGREASING RANGE

**Description**

Biotechnology-based cleaner, stain remover and odour control for carpets and fabrics. **Nu-Karpet Kare™** biodegrades organic matter and eliminates foul odours. This powerful cleaner is Green Wool-safe® approved, in recognition of its performance, fabric compatibility and eco-friendliness.

**Applications**

Ideal for cleaning carpets, area rugs, sofas, car upholstery, curtains and other surfaces covered with fabric or fibres. **FOR PROFESSIONAL USE.**

**Directions**

**Nu-Karpet Kare™** is a concentrated cleaner. Dilute in cold water for use in a spray bottle or an extractor. **Nu-Karpet Kare™** can be used on most carpets, fibres and fabrics. Before first use, always check for colourfastness with a spot test in a hidden area.

**Spot removal:** ① If the spot is fresh and still wet, absorb any excess soil with a clean, dry rag. ② Dilute **Nu-Karpet Kare™** at 1:50 in a spray bottle. ③ Spray liberally on the spot and the area surrounding it. ④ Using a soft-bristled brush or a clean rag, gently brush the surface in a circular movement, working from the spot's edges towards the centre. ⑤ Absorb any excess cleaning solution with a clean, dry rag. ⑥ If necessary, rinse the area with clean water and absorb the excess water.

**Cleaning carpets with an extractor machine:**

**Pre-treatment:** ① Dilute **Nu-Karpet Kare™** at 1:200 in a spray bottle or jug. ② Spray liberally on the soiled areas and on heavy-traffic areas. ③ Let stand, then begin extraction.

**Cleaning with the extractor:** ① Follow the manufacturer's instructions for using the extractor. ② Dilute **Nu-Karpet Kare™** at 1:200 in the extractor's cleaning solution reservoir; use cold water. ③ Using the extractor, spray the cleaning solution over the entire surface to be cleaned. You can work in sections, taking care to ensure sufficient overlap between sections. ④ Clean with the extractor. **Note:** If heavy-traffic areas are very dirty, it may help to pre-treat and clean them with the extractor first, then proceed to extract the full surface of the carpet.

**Cleaning entryways – the Spray & Vac™ method:** The Spray & Vac™ method is a periodic cleaning procedure that helps maintain clean, attractive entryways and heavy-traffic areas.

① Vacuum the carpet. ② Dilute **Nu-Karpet Kare™** at 1:200 in a spray jug. ③ Spray the treatment solution on the area to be cleaned, without drenching the fabric. Spray slightly beyond the soiled areas. ④ Let stand – no need to rinse. ⑤ Repeat as needed. This procedure is quick, so it is easy to turn your daily vacuuming routine into a Spray & Vac™.

Dilution table	
	1:50 - 1:200
	2 - 0.5%
	2.5 - 0.65oz./1gal.

## ■ ALL FABRIC CLEANING & STAIN TREATMENT

### Cleaning tips

When cleaning a spot or a high-traffic area, always clean from the cleanest to the dirtiest area ■ In order not to damage fibres, always work with soft, flexible tools ■ Avoid drenching carpets with water ■ Always test the cleaning solution on a small area before use ■ Always work with clean, well-maintained tools.

### Respect for the environment

#### Tips for being greener

Follow the suggested procedures and dilutions ■ Avoid using hot water or steam ■ Avoid using products with solvents ■ Avoid using fragrances ■ Make good use of entry rugs ■ Closely maintain high-traffic areas ■ Never mix products.

#### Environmental benefits

Reduced environmental stress ■ Low aquatic toxicity and readily biodegradable (according to OECD 301 series tests) ■ Reduced use and disposal of chemical products ■ Concentrated product: reduced transportation (GHG) and packaging ■ No VOCs: helps reduce GHGs ■ Reduction of sick building syndrome ■ Reduced energy use (effective cleaning without steam or hot water).

Fits perfectly into any organisation's efforts to be more eco-responsible by going green.

### Composition

non-ionic surfactants, amphoteric surfactants, bacterial cultures, fragrance, preservative. May contain enzymes.

### Properties

Clear liquid, cool mint scent.

### Regulatory compliance

#### Irritating to the eyes.

Not regulated by the regulation on transport of dangerous goods.

Xi R36

Material safety data sheet available upon request. Read it before using this product.

**Safety advice: S25-** Avoid contact with eyes. **S26-** In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
