

All Surface Cleaning Bathroom Cleaning

CLEANING AND DEGREASING RANGE

Description

Nu-Kleen Smell™ is a biotechnology-based all-surface bathroom cleaner that controls odours at the source.

Applications

Ideal for cleaning mirrors, sinks, faucets, countertops, urinals, toilet bowls, floors and any other surface. Safe for stainless steel, ceramic, melamine, polymers, glass, marble, granite and any other material that resists water. **FOR PROFESSIONAL USE.**

Directions

Nu-Kleen Smell™ is a concentrated cleaner. Dilute with cold water in a bucket or a spray bottle. Wipe surfaces with a clean microfiber cloth, a soft scrub pad, a brush or a flat mop head. Requires no rinsing.

Mirrors: ① Dilute at 1:300 in a spray bottle. ② Mist the mirror with the product. ③ Wipe and polish with a clean, dry rag.

All surfaces: ① Dilute at 1:300 in a spray bottle or bucket. ② Spray or apply the cleaning solution to the surfaces to be cleaned. ③ Scrub with a soft towel. ④ Wipe up any excess cleaning solution.

Floors - Routine cleaning - with a bucket: ① Dilute at 1:300 in a bucket. ② Apply the solution liberally with a flat mop. ③ Scrub. ④ Wipe up any excess cleaning solution.

Floors - Deep down cleaning - with a bucket: ① Dilute at 1:200 in a bucket. ② Apply the solution liberally with a flat mop. ③ Rub or scrub with a brush. ④ Let stand 10-15 minutes. ⑤ Wipe up any excess cleaning solution.

Floors - Routine cleaning - with an automatic scrubber: ① Sweep up any dust or litter from the floor. ② Dilute at 1:600 in the automatic scrubber's cleaning solution reservoir. ③ Clean the floors, making sure the machine removes the cleaning solution properly.

Nu-Kleen Smell™ can also be used with pressure washers.

Cleaning tips

Always clean from the cleanest to the dirtiest area and from the top to the bottom ■ Always work with clean, well-maintained tools ■ Follow the suggested dilutions ■ Never mix products.

Dilution table

1:200 – 1:300 - 1:600

0.5 – 0.25 - 0.16%

0.65 – 0.43 - 0.2oz./1gal.

Respect for the environment

Tips for being greener

Follow the suggested procedures and dilutions ■ Limit the use of disinfectants: adopt the principle of Rational Disinfection (for more information on this subject, ask your Innu-Science sales manager) ■ Do not use chlorinated products (bleach) ■ Avoid using products that mask odours in urinals (tablets, drip systems) ■ Eliminate air freshening systems: kill odours at the source by using **Nu-Kleen Smell™** ■ Train staff on the environmental impact of their work.

Environmental benefits

Reduced environmental stress ■ Low aquatic toxicity and readily biodegradable (according to OECD 301 series tests) ■ Reduced chemical waste ■ Concentrated product: reduced transportation (GHG) and packaging ■ No VOCs: helps reduce GHGs ■ Elimination of VOC-emitting air fresheners and reduction of sick building syndrome ■ Reduced energy use (effective cleaning without hot water).

Fits perfectly into any organisation's efforts to be more eco-responsible by going green.

Technology

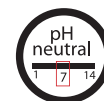

Nu-Kleen Smell™ technology is based on combining readily biodegradable surfactants, active fermentative extracts and natural bacterial cultures. The precise combination of ingredients gets powerful cleaning results without the need for solvents or high pH levels. The fermentative extracts attack soil instead of emulsifying with it. And the bacterial cultures provide deep cleaning in the hardest-to-reach places, while completely eliminating foul odours.

Composition

non-ionic surfactants, amphoteric surfactants, bacterial cultures, dye, fragrance, preservative. May contain enzymes.

Properties

Blue liquid, mint scent.

Regulatory compliance

Irritating to the eyes.

Not regulated by the regulation on transport of dangerous goods.

Xi R36

Material safety data sheet available upon request. Read it before using this product.

Safety phrases: S25- Avoid contact with eyes. **S26-** In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
